Availability: 7 days' notice

## PROFESSIONAL SUMMARY

Results-driven .NET Developer and Full Stack Software Engineer with 5+ years of experience designing, developing, modernising and supporting enterprise applications. Strong hands-on experience with C#, .NET Core, ASP.NET MVC/Web API, REST APIs, SQL Server and MySQL, with additional frontend capability across HTML5, CSS3, Bootstrap, JavaScript and React. Experienced in database-driven business systems, CRM platforms, reporting solutions, workflow automation, system migrations and production environments. Combines software engineering skills with practical systems and infrastructure knowledge to deliver secure, reliable and maintainable solutions.

## TECHNICAL SKILLS

| | |
|---|---|
| **LANGUAGES & FRAMEWORKS** | C#, .NET, .NET Core, ASP.NET MVC, ASP.NET Core, Web API, Java, Spring Boot, Hibernate, PHP, JavaScript |
| **FRONTEND** | HTML5, CSS3, Bootstrap, React, responsive web development, JavaScript |
| **DATABASES** | SQL Server, MySQL, PostgreSQL, SQL queries, database design, maintenance and performance optimisation |
| **APIs & ARCHITECTURE** | REST APIs, backend services, authentication, role-based access control (RBAC), microservices concepts, system integration |
| **REPORTING & DATA** | SSRS, SSIS, Power BI, ETL processes, dashboards, reporting and data integration |
| **TOOLS & PLATFORMS** | Git, GitHub, Jira, IIS, Windows Server, Linux, Microsoft 365, Google Workspace, AnyDesk, PowerShell |

## PROFESSIONAL EXPERIENCE

### Software Developer / IT Systems Specialist — IAWC – FASSET Internship Programme
**2025 – Present**

- Develop enterprise applications and scalable APIs supporting business processes and operational workflows.
- Build and enhance a CRM/business management system covering clients, files, tasks, financial tracking and reporting.
- Develop backend services, database functionality and workflow automation while supporting production applications.
- Maintain databases and reporting solutions; troubleshoot application, system and production issues.
- Configure and support server environments and assist users with technical and application-related issues.
- Support and train FASSET learners through practical software development and technical computing activities.
- Undertake part-time examination invigilation during the FASSET programme, supervising candidates, supporting examination administration and maintaining an orderly examination environment in line with examination procedures.

### Software Developer / Technical Lead — FTM Technologies
**2021 – April 2025**

- Migrated legacy applications to .NET Core and SQL Server and developed RESTful APIs and enterprise backend services.
- Designed, maintained and optimised database-driven business applications and production systems.
- Improved SSRS reporting performance by approximately 40% through reporting and query optimisation.
- Managed IIS configurations and supported Windows Server upgrades, application deployments and production environments.
- Automated database maintenance and operational processes using PowerShell and supported backup and recovery activities.
- Provided technical troubleshooting across applications, databases, infrastructure and business systems.

## PROFESSIONAL EXPERIENCE — CONTINUED

### Full Stack Developer — IAWC

**2020 – 2021**

- Modernised web systems using C# and SQL Server across frontend and backend application components.
- Developed and maintained enterprise application functionality and database-driven workflows.
- Supported system enhancements, infrastructure upgrades, production troubleshooting and technical documentation.

### Software Developer / IT Support — Revival Technologies

**2018 – 2020**

- Developed and maintained web and desktop applications using C#, Java, PHP, HTML5, CSS3 and MySQL.
- Built internal management systems and ETL processes using SQL and SSIS.
- Developed a ticketing system website with database integration and supported application performance improvements.
- Supported IIS, SQL Server, hardware and software environments, and users with technical troubleshooting.

## SELECTED PROJECTS

| | |
|---|---|
| **RDP Housing Management System**<br>C# / .NET / SQL Server | Enterprise housing management solution supporting housing activities, financial processes and database-driven workflows. |
| **CRM / Business Management Platform**<br>C# / Web / MySQL | Business platform covering clients, files, tasks, quotes, invoices, payments, reporting and workflow automation. |
| **Digital Archiving System**<br>Laravel / MySQL | Web-based document storage and digital archiving solution designed for organised file management. |
| **Enterprise APIs & Integrations**<br>C# / REST | Backend APIs and services supporting business applications, integrations and scalable workflows. |

## EDUCATION

**National Diploma in Software Development** — **2018**
Tshwane University of Technology

## ADDITIONAL STRENGTHS

Problem solving • System analysis • Performance optimisation • Database support • Technical troubleshooting • Agile collaboration • Business process automation • Communication • Training and learner support • Examination supervision • Continuous learning

## PROFESSIONAL PROFILE

Combines hands-on software development with practical IT systems support, database administration, production troubleshooting and user assistance. Comfortable working independently, collaborating with technical teams, supporting business users and adapting to changing operational requirements.
